DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The brief description of the drawings section should include a summary of the newly added figure 2.

Claim Objections

3. Claims 10, 15-16 objected to because of the following informalities: the independent claims 15 and 16 recite the phrase 'best-suited display format' is vague and indefinite. The specification fails to provide clear explanation of what is included or excluded by the use of phrase "best-suited display format", therefore meets and bounds of the claims cannot be determined. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 10 and 15-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. Claim 15 recites the limitation "the best-suited display" in line 10. There is insufficient antecedent basis for this limitation in the claim.

7. Claim 15 recites the limitation "the requested data" in line 12. There is insufficient antecedent basis for this limitation in the claim.
8. Dependent claim 10 inherits the same deficiency.
9. Claim 16 recites the limitation "the best-suited display" in line 11. There is insufficient antecedent basis for this limitation in the claim.
10. Claim 16 recites the limitation "the requested data" in line 13. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

11. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

12. Claims 10, 15-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Moriya U.S. Patent Number: 6,161,140 (hereinafter "*Moriya*".)
13. **Referring to claims 15, 16**, taking claim 15 as exemplary, *Moriya* teaches a process for transferring data from a data-preparing device to a data-requesting device [see abstract], comprising: the data-requesting device requests, over a network, data to be transmitted to it by the data-preparing device [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B]; the data-requesting device transmits

to the data-preparing device over the network information data about the capabilities of the data-requesting device, said information data transmitted by the data-requesting device including a list of usable display formats for the data-requesting device [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B]; the data-preparing device then, according to availability at the data-preparing device, selects the best-suited display format from the list of usable display formats transmitted by the data requesting device [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B]; and the data preparing device then transmits data over the network to the data-requesting device in the selected display format [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B.]

14. Referring to claim 10, *Moriya* teaches wherein the information data are transmitted to the data-preparing device over a device engaged between the data-requesting device and the data-preparing device [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B.]

Response to Arguments

15. Applicant's arguments filed 10/25/2007 and 08/02/2007 have been fully considered but they are not persuasive. Applicant argues that *Moriya* does not teach the limitation of "list of usable display format" (emphasis added).

16. Examiner respectfully disagrees with this argument because the term "list" is broad enough to encompass a list of "one element". Therefore, *Moriya* teaches the limitation of "list of usable display format" at column 3, lines 6-36, and column 5, lines 1-26 (a code that describes capability of the display.)

Conclusion

17. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
